PRODUCT OVERVIEW

Tagme3a تجميعة

Build smarter. Buy cheaper.
PC building and live price tracking for the Egyptian hardware market.

MOBILE APP · FLUTTER

2026

THE PROBLEM

Buying hardware in Egypt is slow and uncertain.

01

Scattered prices

Every store lists differently. Finding the best EGP price means checking a dozen sites.

02

Compatibility doubt

Sockets, DDR type, PSU headroom. One wrong part and the build fails.

03

Volatile, stale data

Prices move with the exchange rate. Listings show stock that no longer exists.

THE SOLUTION

One app. Three jobs.

TRACK

Live price tracker

Prices from verified Egyptian stores, with history, spread and drop alerts.

BUILD

Smart PC builder

Pick parts with real-time compatibility checks and a running total in EGP.

CHOOSE

Laptop recommender

Tell us the use case and budget. Get ranked, explained picks.

HOME

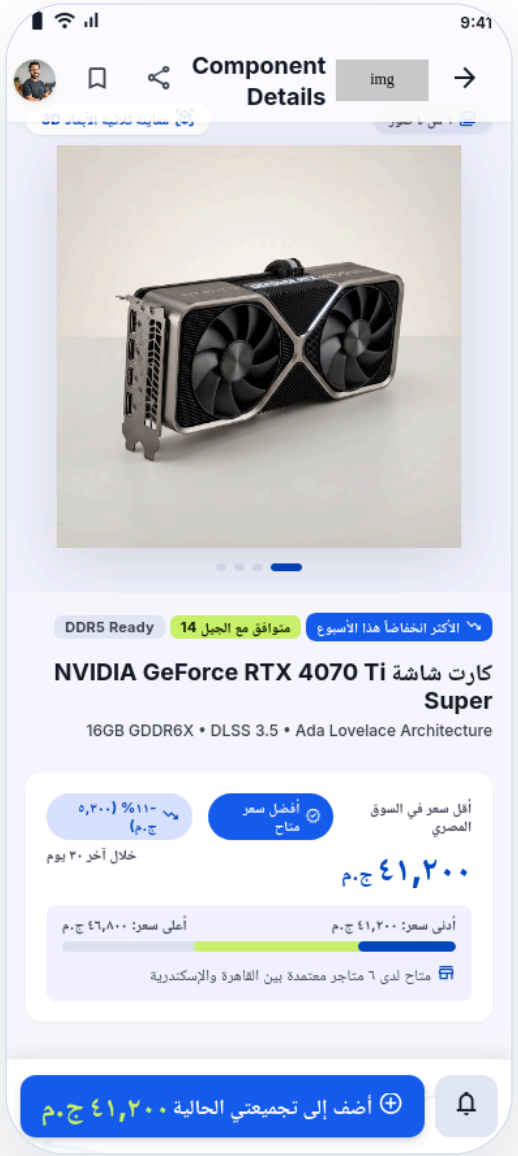

Everything starts with a search or a budget.

Arabic-first, RTL interface with EGP pricing

Category shortcuts: CPU, GPU, boards, RAM, storage

Daily best deals with discount and store count

Instant build prompt: "Build your PC by budget"

PRODUCT DETAIL

Know if the price is actually good.

Lowest price, highest price and the spread between them

Price change over the last 30 days

Available across 6 verified stores

Compatibility badges: DDR5 Ready, Gen 14 compatible

One tap to add to the current build

SMART BUILDER

Mistakes caught before you pay.

- Compatibility score for the whole build
- Estimated power draw against PSU capacity
- Plain-language warnings with a one-tap fix
- Per-part status and cross-store price comparison
- Optimize by budget, or share the build by link

LAPTOP RECOMMENDER

Right laptop, right budget, explained.

Pick a use case: gaming, engineering, editing, 3D, student

Budget slider with quick price brackets

Ranked by match percentage

Local in-stock filter to skip import delays

UNDER THE HOOD

Fresh data, without trusting it blindly.

Scrape

One adapter per merchant, with health monitoring.

Match

Fuzzy and vector matching link listings to one canonical product.

Review

Low-confidence matches go to a human queue.

Verify

Stale prices are flagged, never shown as live.

Notify

Price drops reach users by push alert.

Flutter · Riverpod | FastAPI · PostgreSQL + pgvector · Redis · Meilisearch

ROADMAP

Seven milestones to release.

M0	**Foundation**	Monorepo, tooling, RTL app shell, CI
M1	**Catalog + Auth**	Search, browse, product detail, login
M2	**Scraping MVP**	Two merchants, daily prices, history
M3	**Matching**	90%+ auto-match, review queue
M4	**PC Builder**	Compatibility engine, budget optimizer
M5	**Laptop Recommender**	Scored, ranked, explained picks
M6	**Alerts + Polish**	Push alerts, offline cache, Play Store track

Stop guessing.
Start building.
